5 Trouble shooting ................................................ 17
REFRIGERANT and cyclopentane foaming material used for the appliance are flammable. Therefore, when the appliance is scrapped, it shall be kept away from any fire source and be recovered by a special recovering company with corresponding qualification other than be disposed by combustion, so as to prevent damage to the environment or any other harm.

**CHILDREN** should be supervised to ensure that they do not play with the appliance.

**FOR** EN standard: This appliance can be used by children aged from 8 years and above and persons with reduce physical sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision. Children aged from 3 to 8 years are allowed to load and unload refrigerating appliances.

**TO** avoid contamination of food, please respect the following instructions:

- Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
- Clean regularly surfaces that can come in contact with food and accessible drainage systems.
- Clean water tanks if they have not been used for 48 h; flush the water system connected to a water supply if water has not been drawn for 5 days. (note 1)
- Store raw meat and fish in suitable containers in the refrigerator, so that it is not in contact with or drip onto other food.
- Two-star (***) frozen-food compartments are suitable for storing pre-frozen food, storing or making ice-cream and making ice cubes. (note 2)
- One (★), two (★★) and three-star (★★★) compartments are not suitable for the freezing of fresh food. (note 3)
- If the refrigerating appliance is left empty for long periods, switch off, defrost, clean, dry, and leave the door open to prevent mold from developing within the appliance.

Note 1, 2, 3: Please confirm whether it is applicable according to your product compartment type.

**WARNING**: To avoid a hazard due to instability of the appliance, it must be fixed in accordance with the instructions.

**WARNING**: Connect to potable water supply only. (Suitable for ice making machine)

**WARNING**: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer, and bisphenol A (BPA) and lead which are known to the state of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.
1.2 Meaning of safety warning symbols

Prohibition symbol
This is a prohibition symbol. Any incompliance with instructions marked with this symbol may result in damage to the product or endanger the personal safety of the user.

Warning symbol
This is a warning symbol. It is required to operate in strict observance of instructions marked with this symbol; or otherwise damage to the product or personal injury may be caused.

Note symbol
This is a cautioning symbol. Instructions marked with this symbol require special caution. Insufficient caution may result in slight or moderate injury, or damage to the product.

This manual contains lots of important safety information which shall be observed by the users.

1.3 Electricity related warnings

- Do not pull the power cord when pulling the power plug of the refrigerator. Please firmly grasp the plug and pull out it from the socket directly.
- To ensure safe use, do not damage the power cord or use the power cord when it is damaged or worn.

- Please use a dedicated power socket and the power socket shall not be shared with other electrical appliances. The power plug should be firmly contacted with the socket or else fires might be caused.
- Please ensure that the grounding electrode of the power socket is equipped with a reliable grounding line.

- Please turn off the valve of the leaking gas and then open the doors and windows in case of leakage of gas and other flammable gases. Do not unplug the refrigerator and other electrical appliances considering that spark may cause a fire.

- Do not use electrical appliances on the top of the appliance, unless they are of the type recommended by the manufacturer.
1.4 Warnings for using

- Do not arbitrarily disassemble or reconstruct the refrigerator, nor damage the refrigerant circuit; maintenance of the appliance must be conducted by a specialist.
- Damaged power cord must be replaced by the manufacturer, its maintenance department or related professionals in order to avoid danger.

- The gaps between refrigerator doors and between doors and refrigerator body are small, be noted not to put your hand in these areas to prevent from squeezing the finger. Please be gentle when closing the refrigerator door to avoid falling articles.
- Do not pick up foods or containers with wet hands in the freezing chamber when the refrigerator is running, especially metal containers in order to avoid frostbite.

- Do not allow any child to get into or climb the refrigerator; otherwise suffocation or falling injury of the child may be caused.

- Do not place heavy objects on the top of the refrigerator considering that objects may fall when closing or opening the door, and accidental injuries might be caused.
- Please pull out the plug in case of power failure or cleaning. Do not connect the refrigerator to power supply within five minutes to prevent damages to the compressor due to successive starts.

1.5 Warnings for placement of items

- Do not put flammable, explosive, volatile and highly corrosive items in the refrigerator to prevent damages to the product or fire accidents.
- Do not place flammable items near the refrigerator to avoid fires.

- The refrigerator is intended for household use, such as storage of foods; it shall not be used for other purposes, such as storage of blood, drugs or biological products, etc.
1.6 能耗警示

- 请不要将瓶装或密闭容器中的液体物品如瓶装啤酒、饮料等放入冷冻室，以免冻结爆裂导致其他损失。

1.7 废弃时相关事项

- 该冰箱使用的制冷剂和环戊烷发泡材料均为可燃性材料，废旧冰箱应与火源隔离，不能焚烧处理，请交给具有资质的专业回收公司处理，以免对环境造成危害或引发其它危险。

- 本冰箱废弃不用时，请将本冰箱门卸掉，并拆下门封条及搁物架，将门与搁物架放到合适的位置，以免儿童进入玩耍，发生产意。

1.6 Warnings for energy

Warning for energy
1) Refrigerating appliances might not operate consistently (possibility of defrosting of contents or temperature becoming too warm in the frozen food compartment) when sited for an extended period of time below the cold end of the range of temperatures for which the refrigerating appliance is designed.
2) The fact that effervescent drinks should not be stored in food freezer compartments or cabinets or in low-temperature compartments or cabinets, and that some products such as water ice should not be consumed too cold;
3) The need to not exceed the storage time(s) recommended by the food manufacturers for any kind of food and particularly for commercially quick-frozen food in food-freezer and frozen-food storage compartments or cabinets;
4) The precautions necessary to prevent an undue rise in the temperature of the frozen food while defrosting the refrigerating appliance, such as wrapping the frozen food in several layers of newspaper.
5) The fact that a rise in temperature of the frozen food during manual defrosting, maintenance or cleaning could shorten the storage life.
6) The necessity that, for doors or lids fitted with locks and keys, the keys be kept out of the reach of children and not in the vicinity of the refrigerating appliance, in order to prevent children from being locked inside.

1.7 Warnings for disposal

Refrigerant and cyclopentane foaming material used for the refrigerator are flammable. Therefore, when the refrigerator is scrapped, it shall be kept away from any fire source and be recovered by a special recovering company with corresponding qualification other than be disposed by combustion, so as to prevent damage to the environment or any other harm.

When the refrigerator is scrapped, disassemble the doors, and remove gasket of door and shelves; put the doors and shelves in a proper place, so as to prevent trapping of any child.

Correct Disposal of this product:
This marking indicates that this product should not be disposed of with other household wastes. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.
2 Proper use of refrigerators

2.1 Levelling feet

1) Precautions before operation
Information in the Instruction Manual is only for reference. Before operation of accessories, it shall be ensured that the refrigerator is disconnected from power. Before adjusting the leveling feet, precautions shall be taken to prevent any personal injury.

2) Schematic diagram of the levelling feet

3) Adjusting procedures:
a. Turn the feet clockwise to raise the refrigerator;
b. Turn the feet counterclockwise to lower the refrigerator;
c. Adjust the right and left feet based on the procedures above to a horizontal level.
2.2 Levelling door

1) Precautions before operation:
   Information in the operation is only for reference.
   Before operation of accessories, it shall be ensured that the refrigerator is disconnected from power.
   Before adjusting the door, precautions shall be taken to prevent any personal injury.

2) Schematic diagram of leveling the door

1) Raise the lower door up to the level of the higher door.
2) Insert the supplied fastener-ring by using plier in the gap between the hinge-grommet and the lower hinge.
   The number of fasten-rings you will need to insert depends on the gap.
2.3 Changing the Light

Any replacement or maintenance of the LED lamps is intended to be made by the manufacturer, its service agent or similar qualified person.

2.4 Starting

- Before initial start, keep the refrigerator still for two hours before connecting it to power supply.
- Before putting any fresh or frozen foods, the refrigerator shall have run for 2-3 hours, or for above 4 hours in summer when the ambient temperature is high.
- Spare enough space for convenient opening of the doors and drawers or statement by the distributor.

2.5 Energy saving tips

- The appliance should be located in the coolest area of the room, away from heat producing appliances or heating ducts, and out of the direct sunlight.
- Let hot foods cool to room temperature before placing in the appliance. Overloading the appliance forces the compressor to run longer. Foods that freeze too slowly may lose quality, or spoil.
- Be sure to wrap foods properly, and wipe containers dry before placing them in the appliance. This cuts down on frost build-up inside the appliance.
- Appliance storage bin should not be lined with aluminum foil, wax paper, or paper toweling. Liners interfere with cold air circulation, making the appliance less efficient.
- Organize and label food to reduce door openings and extended searches. Remove as many items as needed at one time, and close the door as soon as possible.
2.6 Placement

- Before use, remove all packing materials, including bottom cushions, foam pads and tapes inside of the refrigerator; tear off the protective film on the doors and the refrigerator body.

- Keep away from heat and avoid direct sunlight. Do not place the freezer in moist or watery places to prevent rust or reduction of insulating effect.

- Do not spray or wash the refrigerator; do not put the refrigerator in moist places easy to be splashed with water so as not to affect the electrical insulation properties of the refrigerator.

- The refrigerator is placed in a well-ventilated indoor place; the ground shall be flat, and sturdy (rotate left or right to adjust the adjustable leg for levelling if unstable).

- The top space of the refrigerator shall be greater than 11.8in, and the refrigerator should be placed against a wall with a free distance more than 3.94in to facilitate heat dissipation.

⚠️ Precautions before installation:
Before installation or adjusting of accessories, it shall be ensured that the refrigerator is disconnected from power.
Precautions shall be taken to prevent fall of the handle from causing any personal injury.

3 Structure and functions

3.1 Key components

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)
Refrigerator body

**Ice storage bin**

**Upper freezer drawer**

**Lower freezer drawer**

---

*(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)*

### Refrigerating chamber
- The Refrigerating Chamber is suitable for storage of a variety of fruits, vegetables, beverages and other food consumed in the short term.
- Cooking foods shall not be put in the refrigerating chamber until cooled to room temperature.
- Foods are recommended to be sealed up before putting into the refrigerator.
- The glass shelves can be adjusted up or down for a reasonable amount of storage space and easy use.

### Freezing chamber
- The low temperature freezing chamber may keep food fresh for a long time and is mainly used to store frozen foods and making ice.
- The freezing chamber is suitable for storage of meat, fish, rice balls and other foods not to be consumed in short term.
- Chunks of meat are preferably to be divided into small pieces for easy access. Please be noted food shall be consumed within the shelf time.

**Note:** Storage of too much food during operation after the initial connection to power may adversely affect the freezing effect of the refrigerator. Foods stored shall not block the air outlet; or otherwise the freezing effect will also be adversely affected.

---

**Cold chamber**
- Cold chamber can prolonged the keeping quality of fruits, vegetables, beverages and other food consumed in the short term.
- Mainly used for storage of fruits, vegetables, beverages and other food consumed in the short term.
- The glass shelves are adjustable for a reasonable amount of storage space and easy use.
- In freezing area,请按照设定“速冻”

**Note:** When first using, please do not store too much food, in order to ensure the freezing effect.
3.2 Functions

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

1. Buttons

① Ice-making button  ② Super cool button
③ Temperature adjusting button of refrigerator room  ④ Temperature adjusting button of freezer room
⑤ Super freeze button  ⑥ Lock/unlock button

2. Display

a) When electrify the refrigerator, the display screen will totally display for 3 seconds, meanwhile the starting up bell rings, then the display screen enters the normal display of operation. (If powered on for first time, the default set temperature of the refrigerator room and the freezer room is 41°F / 0°F).

b) It will display the set temperature of both refrigerator and freezer rooms when there is no fault.

c) Under normal circumstances, the display light will go out after 30 seconds in lock state, button operation on display panel would wake up the display screen; if the opening door action wakes up the display screen, the display light would go out immediately when the door is closed; when the "fault code visible" type of fault occurs, the display screen lights up, and will go out after 30 seconds.

3. Lock/Unlock

a) In the unlock state, press and hold the lock/unlock button for 3 seconds to enter the lock state, and the buzzer sound rings.

b) In the lock state, press and hold the lock button for 3 seconds to enter the unlock state and the buzzer sound rings.

c) It will enter the lock state if there is no opening door action or any buttons operation within 30 seconds.

d) The alarm sound can be stopped by pressing any one button in lock state, but all other button operations need to be performed in unlock state. If you operate in the lock state, an error beep will be given.

4. Refrigerator temperature setting

Click the temperature adjusting button of refrigerator room to change the set temperature of refrigerator room. Each time click the button, the set temperature will drop 1°F. When the set temperature reaches the 34°F, click the button again, the set temperature will switch to 44°F. The temperature setting will take effect after the display panel is locked.

5. Freezer temperature setting

Click the temperature adjusting button of freezer room to change the set temperature of freezer room. Each time click the button, the set temperature will drop 1°F. When the set temperature reaches the -7°F, click the button again, the set temperature will switch to 7°F. The temperature setting will take effect after the display panel is locked.
6. 模式设定
1. 按速冷键，启动速冷功能，冷藏自动设定34°F，同时速冷指示灯亮；退出速冷模式时，冷藏室设定温度自动恢复到速冷模式之前的设定温度。
2. 按速冻键，启动速冻功能，冷冻自动设定-7°F，同时速冻指示灯亮；退出速冻模式时，冷冻室设定温度自动恢复到速冻模式之前的设定温度。
3. 按除霜键，除冰功能在on/off之间切换，除霜指示灯亮时，表示启动除霜功能。

7. 故障指示

6. Mode setting
1) Press the [SUPER COOL] button to start the super cool function. The refrigerator room is set at 34°F automatically, and the [SUPER COOL] icon shines. When exit the super cool mode, the set temperature of refrigerator room will go back to the set temperature before super cool mode.

2) Press the [SUPER FRI] button to start the super freeze function. The freezer room is set at -7°F automatically, and the [SUPER FRI] icon shines. When exit the super freeze mode, the set temperature of freezer room will go back to the set temperature before super freeze mode.

3) Press the [ICE MAKER] button, the ice-making function could be switched between on/off. When the [ICE MAKER] icon is on, it indicates that the ice-making function is activated.

7. Error code
When the following tips to appear on the display screen, it indicates a problem with the refrigerator. Although the refrigerator in the following fault case can still provide cool/free freeze functions, but the user should contact maintenance personnel, ensure the normal use of refrigerator.

4. Maintenance and care of the appliance

4.1 Overall cleaning

- Dust behind the refrigerator and on the ground shall be timely cleaned to improve the cooling effect and energy saving. The interior of the refrigerator should be cleaned regularly to avoid odor. Soft towels or sponge dipped in water and non-corrosive neutral detergents are suggested for cleaning. The freezer shall be cleaned with clean water and dry cloth. Open the door for natural drying before the power is turned on.

- Do not use hard brushes, clean steel balls, wire brushes, abrasives, such as toothpastes, organic solvents (such as alcohol, acetone, banana oil, etc.), boiling water, acid or alkaline items clean refrigerator considering that this may damage the fridge surface and interior.

- Do not rinse with water so as not to affect the electrical insulation properties.

⚠️ Please unplug the refrigerator for defrost and cleaning.

4.2 Cleaning of door tray

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

- According to the direction arrow in the figure below, use both hands to squeeze the tray, and push it upward, then you can take it out.
- After washing the tray having been taken out, you can adjust its installing height in accordance with your requirement.
4.3 Cleaning of shelf

The lower freezer drawer should not be removed for purposes other than cleaning and maintenance.

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

- Please dismantle the cantilever shelf according to the arrows shown as above:
  1. Please hold the front edge of shelf, and tilt the shelf inwards until the lower end of fixed leg is separated from the slot of supporting iron;
  2. Uplift the whole shelf until it can not rise anymore;
  3. Take out the shelf horizontally.

- During installation, put the upper end of the fixed leg into one of the upper slots on the supporting iron first and then put the lower end of the fixed leg into the third slot on the lower part of the supporting iron.

4.4 Cleaning of freezer lower drawer

- Pull out the lower freezer drawer to the proper position.
- As shown in the Fig., press the buttons in both slots respectively (must press both sides at the same time), pull out the freezer drawer until it stops.
- Take out the lower drawer as directed by the arrows.
- After cleaning, put back the drawer to original position, then close the lower drawer, the button will lock the drawer automatically.

Note: The lower freezer drawer should not be removed for purposes other than cleaning and maintenance.
4.5 Installing the Water Line

Installing the Water Line

Water line installation kits are available as an additional accessory from your dealer or at a local hardware store.

Connecting To The Water Supply Line
1. First, shut off the main water supply line and turn the ice-maker off.
2. Locate the nearest cold water supply valve.
3. After connecting the water supply to the water valve, turn your main water supply back on and flush several gallons of water to clear the water supply line.

Connecting the Water Line to The Refrigerator

There are several items that you need to purchase to complete this connection.

You will find these items sold as a kit at your local hardware store.

1. First, water tubes (supplied) insert into corresponding hole of water connector (supplied).

2. Second, water line installation kit (not included) inserts into another hole of water connector (supplied).

3. Turn water valve on and check for any leakage

Connecting the Water Line to A Drinkable Water Source

If your water line is NOT drinkable, please add an external water filter.

If you must repair or disassemble the water line, cut off the plastic tubing to make sure you get a snug, leak-free connection.
4.6 Defrosting

- The refrigerator is made based on the air-cooling principle and thus has automatic defrosting function. Frost formed due to change of season or temperature may also be manually removed by disconnection of the appliance from power supply or by wiping with a dry towel.

4.7 Out of operation

- Power failure: In case of power failure, even if it is in summer, foods inside the appliance can be kept for several hours; during the power failure, the times of door opening shall be reduced, and no more fresh food shall be put into the appliance.

- Long-time nonuse: The appliance shall be unplugged and then cleaned; then the doors are left open to prevent odor.

- Moving: Before the refrigerator is moved, take all objects inside out, fix the glass partitions, vegetable holder, freezing chamber drawers and etc. with tape, and tighten the levelling feet; close the doors and fix them with tape. During moving, the appliance shall not be laid upside down or horizontally, or be vibrated; the inclination during movement shall be no more than 45°.

⚠️ The appliance shall run continuously once it is started. Generally, the operation of the appliance shall not be interrupted; otherwise the service life may be impaired.
5 答疑解惑
对以下一些简单的问题，您可以尝试自己动手解决。若没有改观，请致电售后服务部门。

| 冰箱不工作 | 电源是否接通，插头是否插牢
| 冰箱有异味 | 有异味的食品应该严密封装
| 压缩机长时间工作 | 夏季环境温度高，压缩机工作时间长属于正常现象
| 冰箱灯不亮 | 冰箱是否通电，照明灯是否损坏
| 冰箱门关不上 | 食物包装卡住门把手造成门无法关上
| 喷声大 | 地面是否平整，冰箱放置是否平稳
| 门封有闪缝 | 清除门封上杂物
| 接水盘漏水 | 内饰物品存放过多或水分过大，导致化霜水量大
| 冰箱外壳发热 | 内置冷却器在内部通过外壳散热，属于正常现象
| 外壳凝露 | 环境温度过高时，食品表面和门缝处会有凝露现象
| 冰箱有异音 | 嗡嗡声；压缩机工作时会产生嗡嗡声，应该进行判断是不是属于正常现象

5 Trouble shooting
You may try to solve the following simple problems by yourself. If they cannot be solved, please contact the after-sales department.

| Failed operation | Check whether the appliance is connected to power or whether the plug is in well contact.
| Odor | Odorous foods shall be tightly wrapped.
| Long-time operation of the compressor | Long operation of the refrigerator is normal in summer when the ambient temperature is high.
| Light fails to get lit | Check whether the refrigerator is connected to power supply and whether the illuminating light is damaged.
| Doors cannot be properly closed | The door is stuck by food packages.
| Loud noise | Check whether the floor is level and whether the refrigerator is placed stably.
| Door seal fails to be tight | Remove foreign matters on the door seal.
| Water pan overflows | There is too much food in the chamber or food stored contains too much water, resulting in heavy defrosting.
| Hot housing | Heat dissipation of the built-in condenser via the housing, which is normal.
| Surface condensation | Condensation on the exterior surface and door seals of the refrigerator is normal when the ambient humidity is too high. Just wipe the condensate with a clean towel.
| Abnormal noise | Buzz: The compressor may produce buzzes during operation, and the buzzes are loud particularly upon start or stop. This is normal.
| Creak: Refrigerant flowing inside of the appliance may produce creak, which is normal.
